Message from the Guest Editors

Dear Colleagues,

Almost fifty years have passed since the subject of urban research became a mainstream research issue in the context of the global economy. One of the themes in this area is the outsize impact of cities in the world economy, reaching outside national borders and creating linkages with the world's economy. The energy sector is an important component of the global economy that drives the development of others sectors of the economy. Energy sector corporations are able to impact not only the local scale, but also the global scale of the economy. Factors such as changes in technology, political unrest in areas with energy sector facilities, and efforts to support alternative energy sources may trigger major changes in the significance and location of energy firms in Europe. Researchers studying the significance of energy corporations in Europe are facing new types of challenges. We wish to invite you to submit analytical papers focused on global issues, traditional case studies, and theoretical research works revolving around the issues described above.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, AGRIS, Inspec, CAPlus / SciFinder, and many other databases.

Journal Rank: [CiteScore](#) - Q1 (*Control and Optimization*)
