Deadline for manuscript
submissions:

30 November 2021

Message from the Guest Editor

Dear Colleagues,

Recently, there has been significant research interest in tackling the various environmental problems with the associated findings of empirical applications and their policy implications.

The main purpose of this Special Issue is to feature the theoretical and empirical practice of sustainable policy performance measurement. Results will be discussed in support of sustainable energy policies. This Special Issue seeks the methodological framework to contribute to sustainable energy policy development, provide energy policy initiatives targeted to socio-economic goods/benefit, to capture sustainability obstacles and negative environmental impacts, and to highlight links and interactions between economic and environmental systems.

The expected outcome is to set targets, propose models for sustainable growth and energy policies, and analyze policy interactions. Potential contributors are researchers and specialists in environmental, natural resources, and energy economics; ecologists; and environmental engineers.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, AGRIS, Inspec, CAPlus / SciFinder, and many other databases.

Journal Rank: [CiteScore](#) - Q1 (*Control and Optimization*)
