submissions:

**closed (31 December 2021)**

### Message from the Guest Editor

I would like to extend a warm invitation to submit research papers to the Special Issue of *Energies* (ISSN 1996-1073; CODEN: ENERGA) on "Energy Data Visualization". Energy applications are gaining wider attention in the visualization community as data dealing with energy problems become more accessible. Computational models, networks of sensors, and operational data are just a few examples of data sources, and these data target varying aspects of the energy sector, including generation, costs, demand, and security. In addition, the tasks and goals demanded on the data range from basic understanding to analysis, operational management, and predictive planning. Thus, the broad span of data sources, range of purpose, and the variety of users makes visualization in the energy domain quite challenging.

In this Special Issue, we are soliciting visualization work that targets the challenges for visualization encountered in the energy domain. The goal of this Issue is to bring together visualization work from disparate energy fields and highlight research that may be beneficial across the confluence of visualization and the energy sector.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Control and Optimization*)
