Addressing Challenges of Low-Carbon Energy Transition

Guest Editors:

Dr. Grigorios L. Kyriakopoulos

Prof. Dr. Dalia Streimikiene

Prof. Dr. Tomas Baležentis

Deadline for manuscript
submissions:

closed (31 May 2021)

Message from the Guest Editors

This Special Issue welcomes contribution of scholars from various fields to shed more light on problems of energy poverty during low-carbon transition. There are several important research areas which are necessary to address: defining the main reasons why households do not take up the initiatives designed to help them out of energy poverty, investigating the main barriers to behavior changes, and defining the best measures to overcome behavioral and psychological barriers in order to effect change in habitual behavior so as to increase energy efficiency and mitigate climate change. Large-scale quantitative research based on big data is also necessary in this field. Theoretical studies, reviews, and case studies are welcome.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
