Energy Storage: From Chemicals to Materials and More

Guest Editors:

Prof. Dr. Nídia Caetano

Dr. Danny Sutanto

Dr. António A. Martins

Dr. Hooman Farzaneh

Dr. Meisam Tabatabaei

Prof. Dr. Carlos Felgueiras

Deadline for manuscript
submissions:
closed (15 September 2020)

Message from the Guest Editors

This Special Issue of *Energies* aims to contribute to the energy storage agenda through a combination of multi-disciplinary and state-of-the-art scientific knowledge, to improve energy availability, security, and the performance and competitiveness of current or future renewable energy generation systems.

We invite authors of papers on innovative technical developments, reviews, case studies, and strategic and policy discussions, as well as assessments from different disciplines that are relevant to energy storage. Some examples are topics such as the development, analysis, and implementation of novel batteries; phase-change materials and their applications; energy-systems integration; life-cycle analysis of energy-storage systems; the integration of energy-storage systems in sustainable buildings; pumped-hydro energy storage; energy storage and electrical vehicles; fuel cells; hydrogen and methane as energy carriers; power-to-gas or other forms of energy storage in chemical compounds; information management; financial and economic analysis of energy storage systems; smart grids and energy systems; and energy policy; among others.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
