an Open Access Journal by MDPI

Advanced Materials for Energy Harvesting, Storage and Conversion

Guest Editors:

Dr. Xian-Kui Wei

College of Chemistry and
Chemical Engineering, Xiamen
University, Simingnan Road No.
422, Xiamen 361005, China

Dr. Zenghui Liu

School of Electronic Science and
Engineering, Xi'an Jiaotong
University, Xi'an 710049, China

Deadline for manuscript
submissions:

31 July 2024

Message from the Guest Editors

Dear Colleagues,

With the ever-increasing energy consumption, energy crisis would sweep across the globe and seriously hinder the economy development if necessary steps were not taken. For this reason, intensive attention has been paid to make efficient use of various energy sources such as wind, geothermal, biomass, hydropower, and to produce clean and renewable energies such as hydrogen via chemical fuels via photocatalytic water splitting, solar cells, etc. Currently, most functional materials suffer from common drawbacks like low efficiency, low reliability, and high cost, which hinder their practical device applications. In this context, we launch this special issue to push advancement in this direction by collecting articles, letters, reviews, progress and perspectives about material fabrication, performance, fundamental mechanisms, novel structural and engineering strategies, etc. Focusing on energy harvesting, storage and conversion, the materials and applications may range from dielectrics, ferroelectrics, piezoelectrics, thermoelectrics, photocatalysis, photovoltaics, fuel cells, batteries to supercapacitors and so on.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
