Message from the Guest Editor

This Special Issue seeks contributions that cover a wide spectrum of research related to exhaust emission control and reduction, with a primary emphasis on hybrid and electric vehicles. Topics of interest include, but are not limited to:

- Advanced engine technologies for emission reduction;
- Challenges and research trends pertaining to exhaust emissions;
- Powertrain and emission testing;
- The integration of renewable energy sources with hybrid/electric vehicles;
- The impacts of alternative fuels and propulsion systems on emissions;
- Energy transfer in alternative vehicles;
- Energy management and storage systems.

Keywords

- exhaust emission
- road tests
- combustion engines
- electromobility
- hybrid and electric vehicles

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
