Deadline for manuscript
submissions:

10 August 2019

Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to provide a forum for communicating recent advances in Marine and hydrokinetic (MHK) energy research from the fluid dynamics point of view. Topics of interest comprise, but are not limited to, the following:

- Computational fluid dynamics modeling and analysis;
- Laboratory and field scale experimental studies;
- Resource characterization;
- Design and testing of MHK devices;
- Design and optimization of device layouts;
- Impact of MHK devices on the health of aquatic environments;
- Effects of MHK devices on the transport of debris and sediments;
- Impact on waterway stability.

Prof. Dr. Fotis Sotiropoulos

Prof. Dr. Xiaolei Yang

Mechanical and Aerospace
Engineering, University of Roma
Sapienza, Via Eudossiana 18,
00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex, Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 13.4 days after submission; acceptance to publication is undertaken in 5.6 days (median values for papers published in this journal in the second half of 2018).
