submissions:

closed (15 August 2023)

Message from the Guest Editor

The aim of this Special Issue is to collect theoretical and practical analyses of the energy transition and the future of energy policy for different actors (individuals, workers, firms, regions, countries, etc.). It aims to understand how renewable energies can shift to a sustainable world, and what policies need to be implemented in order to enact the energy transition. This Special Issue also welcomes contributions at the methodological level presenting new ways of capturing the future of energy policy in different countries. It is also open to case studies (policies at country level, local policies, etc.).

Potential topics may include, but are not limited to:

- The future of energy policy;
- Energy transition and energy policies needed;
- Climate change and energy transition;
- Renewable energies;
- The potential of green hydrogen;
- Technologies and energy transition;
- Greenhouse gases and energy transition;
- Challenges to energy transition;
- Energy policy and sustainability;
- Low-carbon economy and energy transition;
- Global crisis and energy transition.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
