## New Trends in Power Generation for Modern Renewable Energy

Guest Editors:

### **Dr. Raluca-Andreea Felseghi**

Mechanical Engineering  
Department, Faculty of  
Automotive, Mechatronics, and  
Mechanical Engineering,  
Technical University of Cluj-  
Napoca, Bd. Muncii, No. 103-105,  
400641 Cluj-Napoca, Romania

### **Dr. Paula V. Ungureşan**

Mechanical Engineering  
Department, Faculty of  
Automotive, Mechatronics, and  
Mechanical Engineering,  
Technical University of Cluj-  
Napoca, Bd. Muncii, No.103-105,  
400641 Cluj-Napoca, Romania

Deadline for manuscript  
submissions:

**closed (4 February 2025)**

### **Message from the Guest Editors**

This Special Issue aims to present and disseminate the most recent advances related to the theory, algorithm, design, modelling, application, assessment, control, condition monitoring, optimal planning, development and implementation strategies and policies, challenges and way forward of power generation for modern renewable energy.

Topics of interest for publication include, but are not limited to:

- Endless renewable energy potential (solar, wind, oceanic, nuclear, geothermal, bioenergy, hydrogen energy, tritium energy);
- Advances and applications of renewable energy;
- Clean energy conversion technologies;
- Renewable energy and energy storage systems;
- Optimal consumption planning;
- Smart grids and microgrids;
- Clean energy in a circular economy;
- Application of renewable energy technologies;
- Machine learning models in forecasting of virtual power plant;
- Digital Twin technology applications for power generation of modern renewable energy;
- AI-enabled energy management systems.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
