The Governance of Sustainable Cities and Innovative Transport

Guest Editors:

Prof. Dr. Martin De Jong

Prof. Dr. Rui Mu

Prof. Dr. Araz Taeihagh

Deadline for manuscript
submissions:

closed (31 March 2018)

Message from the Guest Editors

Around the world, much is expected of sustainable urbanization. The idea that comfortable life with all basic amenities and more, that also preserves the environment is simply too alluring to refuse. Concepts such as sustainable cities, eco cities, low carbon cities, intelligent cities, smart cities, resilient cities, knowledge cities and compact cities all respond to this hope, but they offer little more than fairly hazy perspectives. When it comes to urban mobility, this begs the question which modern and innovative options do smart sustainable cities offer for their integrated transport systems? How are they governed and organized, which solutions do they adopt in terms of their infrastructure and rolling stock? What promising technologies and information systems do they utilize now or are they proposing for their future and how do they deal with them? And finally, how truly sustainable, low carbon and ecologically friendly are they and will they be in the coming decades?

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
