Heating, Cooling, and Ventilation Systems: Applications and Performance

Guest Editors:

Dr. Jan Kaczmarczyk

Dr. Joanna Ferdyn-Grygierek

Prof. Dr. Robert Sekret

Deadline for manuscript
submissions:

closed (31 May 2021)

Message from the Guest Editors

Buildings account for a substantial proportion of global energy consumption and significantly contribute to CO₂ emissions. The largest contributors to high-energy consumption in buildings are heating, ventilation, and air conditioning (HVAC) systems. Increased energy use by HVAC systems may arise from inappropriate system selection, incorrect design, as well as errors made during their installation, operation, and maintenance. Therefore, it is important to search for and apply efficient, innovative HVAC solutions and assure their adequate operation.

This Special Issue focuses on documenting the performance of heating, ventilation, and cooling systems in buildings, demonstrating new solutions and innovative applications of HVAC systems. For publication, we invite original papers containing experimental research, case studies, or extensive discussion on this topic.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
