## Hydrothermal Technology in Biomass Utilization & Conversion

Guest Editors:

**Prof. Dr. David Chiaramonti**

ReCORD – Renewable Energy Consortium for Research and Demonstration and Department of Industrial Engineering of the University of Florence, Viale Morgagni 40, Florence, Italy

**Prof. Dr. Andrea Kruse**

Department of Conversion Technologies of Biobased Resources, Institute of Agricultural Engineering, University of Hohenheim, Garbenstrasse 9, 70599 Stuttgart, Germany

**Dr. Ing. Marco Klemm**

DBFZ Deutsches Biomasseforschungszentrum gemeinnützige GmbH, Leipzig, Germany

### Message from the Guest Editors

The possibility of converting biomass into fuels and products through wet processes is becoming more and more attractive, as new feedstock and applications are appearing on the scene of bioeconomy and bioenergy. Hydrothermal processing of various type of biomass, waste and residues thus rised the interest of many researchers and companies around the world, together with downstream upgrading processes and technologies: solid products as biochar, for instance, or liquid ones as crude bioliquids, are finding new market opportunities in circular economy schemes. The Special Issue aims at collecting recent innovative research works in the field, from basic to applied research, as well as pilot industrial applications/demo. The outcome will constitute a valuable set of references for those investing time and effort in research in the field.

Deadline for manuscript submissions:

**closed (29 April 2019)**

Industrial Engineering, University  
Nicolò Cusano, 00166 Roma,  
Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
