Deadline for manuscript
submissions:

21 January 2021

Message from the Guest Editors

The Guest Editors are inviting submissions to a Special Issue on Sustainable Financial and Economic Development on Greenhouse Gas Emission. This Special Issue will deal with: the impact of sustainable financial systems (public, commercial) on mitigating greenhouse gas emissions; the role of sustainable finance and financial markets in reducing greenhouse gas emissions; the relationship among sustainable finance and sustainable economic development and greenhouse gas emissions, business models of financial institutions, and companies and their impact on sustainable financial and economic development; the role of the financial market in supporting green consumerism and reducing greenhouse gas emissions; sustainable economic, financial development and ESG risk; sustainable financial and economic development on greenhouse gas emission and social and environmental consequences; the drivers of sustainable financial and economic development; and key challenges and prospects of sustainable financial, economic development and greenhouse gas emissions.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access:—free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex, Scopus and other databases.

CiteScore (2019 Scopus data): 3.8; ranked 19/101 (Q2) in "Control and Optimization", 62/216 (Q2) in "Energy Engineering and Power Technology", 208/670 (Q2) in "Electrical and Electronic Engineering", 33/98 (Q2) in "Fuel Technology", 9/23 (Q2) in "Energy (miscellaneous)", and 72/179 (Q2) in "Renewable Energy, Sustainability and the Environment".
