Deadline for manuscript
submissions:

closed (17 February 2022)

Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Energies* welcomes contributions focused on advanced materials obtained by nanotechnologies which can give Li- and Na-Ion batteries a higher capacity, better rate capability, and a longer cycle life. Meanwhile, research on the synthesis methods of these novel materials is also highly welcomed.

- nanoscale electrode materials for lithium- and sodium-ion batteries
- nanosized electrode materials for lithium- and sodium-ion batteries
- nanostructured electrode materials for lithium- and sodium-ion batteries
- synthesis methods for nanosized and nanostructured electrode materials

Prof. Dr. Nina V. Kosova

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
