

Machine Learning and Deep Learning for Energy Systems

Guest Editor:

Prof. Dr. Valentina E. Balas

Automatics and Applied Software
Department, Aurel Vlaicu
University of Arad, 310130 Arad,
Romania

Message from the Guest Editor

This Special Issue aims to provide comprehensive coverage on cutting-edge research and state-of-the-art methods on machine learning, data science, and deep learning applications on energy-related projects. Authors are requested to submit papers on (but not limited to) the following topics:

Deadline for manuscript
submissions:

closed (31 January 2022)

1. Optimization of renewable energy using machine learning and deep learning;
2. Machine learning and deep learning models for mitigation of wind power fluctuation and methods for power generation;
3. Prediction of levelized cost of electricity;
4. Forecasting model for wind speed and hourly and daily solar radiation;
5. Predictive models for smart building with heating and cooling load prediction;
6. Saving energy using predictive models;
7. Prediction of hourly global solar irradiation;
8. Forecasting of PV power generation;
9. Performance evaluation of solar thermal energy systems;
10. Classifications using deep learning or advanced machine learning for power quality disturbances;
11. Electricity market price prediction using advanced machine learning;
12. Case study on combined applications of machine learning, IoT and big data for energy efficiency.

energies

an Open Access Journal by MDPI

Editor-in-Chief

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
