

Modeling Multiphase Flow and Reactive Transport in Porous Media

Guest Editors:

Prof. Dr. Reza Soltanian

Dr. Marwan Fahs

Prof. Dr. Hussein Hoteit

Prof. Zhenxue Dai

Prof. Dr. Jesús Carrera

Deadline for manuscript
submissions:
closed (30 March 2022)

Message from the Guest Editors

Many fundamental and practical aspects of multiphase flow processes, which are crucial in various energy and environmental applications, are not well understood. For instance, how are the processes controlled by interplay between large-scale flow patterns, such as fingering and local-scale Fickian diffusion, mechanical dispersion, and chemical reaction? How can we incorporate small-scale physical and chemical processes in the pore and core-scale into large-scale multiphase flow and transport models? How does the heterogeneous nature of rock–fluid properties and its uncertainty impact multiphase flow dynamics? What are the implications of thermodynamic changes in fluid properties?

Topics of interest include but are not limited to:

- Multiphase flow in porous and fractured reservoirs;
- Geochemistry and reactive transport;
- Pore-scale processes;
- Constitutive relations;
- Enhanced oil/gas recovery;
- Upscaling flow and transport parameters;
- Coupled hydraulic, thermal, mechanical, chemical, and biological processes;
- Advanced modeling framework and methods.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
