Deadline for manuscript
submissions:

closed (31 March 2022)

Message from the Guest Editor

Dear Colleagues,

We are inviting submissions to a Special Issue of the journal *Energies* on the topic of “Next-Generation Power and Energy Systems”.

The world is experiencing a profound energy transition accelerated by decarbonization, digitalization, and decentralization. Future power and energy systems will require new features to satisfy the needs of grid operators and consumers, aiming at increasing the reliability and resilience of the power grid considering the increasing integration of emergent technologies. As large amounts of data are generated in different segments of the energy sector, it is necessary to extract valuable information from these data for efficient and sustainable utilization of electrical energy.

This Special Issue subject areas may range from methods for the analysis and control of future power systems, to the design of new energy markets and business models, policies and regulations driving the energy transition.

Prof. Dr. Seon-Ju Ahn

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
