

Design and Implementation of Control Schemes for Wave Energy Systems

Guest Editor:

Prof. Dr. Oscar Barambones

Department of System
Engineering and Automation,
Faculty of Engineering of Vitoria-
Gasteiz, University of the Basque
Country, UPV/EHU, Vitoria, Spain

Deadline for manuscript
submissions:

closed (5 December 2023)

Message from the Guest Editor

Dear Colleagues,

We are inviting submissions to the *Energies* Special Issue “Design and Implementation of Control Schemes for Wave Energy Systems”.

This Special Issue of *Energies* aims at addressing the challenges in the control design and implementation of Wave Energy Systems used to convert wave energy in electrical energy. Original submissions focusing on new control techniques and the practical implementation of these new control schemes, which are useful for increasing our knowledge of Wave Energy Systems, on the basis of one or more of the following topics, are welcome in this Special Issue. The Issue will include, but is not be limited to, the following topics:

- Adaptive control schemes
- Robust control schemes
- Sliding mode-based control schemes
- Fuzzy logic-based control schemes
- Neural network-based control schemes
- Observer-based control schemes
- Practical implementation of advanced control schemes

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
