## Latest Papers Related to OWPT 2019-22 on the Topics of Photovoltaic Components, Devices and Systems

Guest Editors:

**Prof. Dr. Akira Ishibashi**

Research Institute for Electronic  
Science, Hokkaido University,  
Sapporo, Hokkaido 001-0020,  
Japan

**Dr. Tomoyuki Miyamoto**

Institute of Innovative Research,  
Tokyo Institute of Technology,  
Yokohama 226-8503, Japan

**Prof. Dr. Takeo MARUYAMA**

College of Science and  
Engineering, Kanazawa  
University, Ishikawa 920-1192,  
Japan

Deadline for manuscript  
submissions:

**closed (8 May 2023)**

### Message from the Guest Editors

Dear Colleagues,

The optical power transmission technologies could be heavily applied, in the near future, to a wide range of applications from, for example, minute IoT terminals, home appliances, and industrial equipment to power transmission infrastructures in various environments for which conventional methods are difficult to apply. Although basic technical functions of these optical power transmission technologies have already been being studied, practical and commercial systems are still in very early stages, and thus, the activation of related research is strongly needed for the developments of many applications. Clarifying both the superiority and the problems of the optical power transmission, we will be able to fully grasp the state of the art of those fields, such as materials, devices, components, and systems that can be used not only for optical power transmission but also for solar-power conversion. We are ready to bring many valuable social benefits to mankind.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
