## Political Economy of Energy Policies

Guest Editor:

**Prof. Dr. David Mares**

Department of Political Science,  
University of California San  
Diego, La Jolla, CA 92093, USA

Deadline for manuscript  
submissions:

**closed (20 June 2022)**

### Message from the Guest Editor

Dear colleagues,

I will be editing a Special Issue of the open access journal *Energies* on “The Political Economy of Energy Policies”. Energy, in its various forms, lies at the center of domestic and international politics. Development, social welfare, climate change, Russian adventurism, China’s new assertiveness, and the inconsistencies in US foreign and domestic policies all demonstrate the importance of energy supplies and trade. Policy decisions, whether specifically focused on energy or simply producing externalities on energy resources and markets, have a fundamental impact on the exploration, production, transmission, and distribution of energy supplies.

This Special Issue seeks to contribute to a better understanding of the challenges and determinants of policy choices that impact energy supplies, markets, and consumption. We invite papers on international and domestic topics regarding conventional, unconventional, and renewable sources of energy from different disciplines, which are relevant to policy choice, implementation, and evaluation. Illustrations of innovative responses to implement best practices are especially welcome.

Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
