Challenge and Research in Sustainable and Renewable Energy Systems: Traditional Energy Paradigms and the Renewables Revolution

Guest Editors:

**Prof. Dr. Ignacio De los Ríos
Carmenado**

Dr. Vasilii Erokhin

Prof. Dr. Tianming Gao

Prof. Dr. Jean Vasile Andrei

Prof. Dr. Florinel Dinu

Deadline for manuscript
submissions:

closed (30 April 2022)

Message from the Guest Editors

The recent evolution and reconfiguration of the global energy paradigm has imposed new approaches in understanding the relation between traditional energy production and renewables.

This Special Issue aims to address critical challenge and research in sustainable and renewable energy systems attempts in view of progressing energy production, trade, transportation, communication, and other spheres of the energy global value chains. We welcome submissions from all areas related to energy production and effects in the economy as a whole, with a high degree of novelty as full-length articles, reviews, and conceptual papers. Both theoretical and practical contributions that focus on the topics related to the economic effects of renewables and just transition across developing countries are encouraged.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
