Advances in Rotating Electric Machines

Guest Editor:

Prof. Dr. Sérgio Cruz
1. Department of Electrical and Computer Engineering, Instituto de Telecomunicações, University of Coimbra, Pólo 2-Pinhal de Marrocos, P-3030-290 Coimbra, Portugal
2. Instituto de Telecomunicações, Pólo 2-Pinhal de Marrocos, P-3030-290 Coimbra, Portugal

Deadline for manuscript submissions:
closed (31 March 2020)

Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to present and disseminate the most recent advances related to the theory, design, modelling, application, control, and condition monitoring of all types of rotating electric machines.

Topics of interest for publication include, but are not limited to:

- All aspects of induction machines, permanent magnet synchronous machines, synchronous reluctance machines, switched reluctance machines, brushless dc machines and emerging PM machines, among others
- Electric motor/generator technologies for more electric aircraft, electric vehicles and wind energy conversion systems
- Machines for safety-critical applications
- Novel applications of electric machines
- Multiphase machines and drives
- Modular machines
- Fault-tolerant machines
- Online and offline condition monitoring techniques
- Optimal design methodologies
- Advanced modelling approaches
- Thermal and vibroacoustic analyses

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: CiteScore - Q1 (Control and Optimization)
