Smart and Sustainable Energy Hubs for a Future Integrated Energy System

Guest Editors:

Dr. Sambeet Mishra

Faculty of Technology,
Department of Electrical,
University of South-Eastern
Norway, 3603 Porsgrunn, Norway

Dr. Chiara Bordin

Department of Computer
Science, UiT - The Arctic
University of Norway, Tromsø,
Norway

Prof. Dr. Frank Eliassen

Department of Computer
Science, University of Oslo, Oslo,
Norway

Deadline for manuscript
submissions:

closed (12 June 2024)

Message from the Guest Editors

Dear colleagues,

Don't miss out on the opportunity to contribute to our upcoming Special Issue: "Smart and Sustainable Energy Hubs for a Future Integrated Energy System".

Energy hubs are a promising concept for future energy systems, as they provide an interface between energy infrastructure and end-users, enabling the management of integrated multi-energy systems. However, to transition towards low-carbon energy, energy hubs must be both smart and sustainable.

This Special Issue invites interdisciplinary research, from computer science, mathematics, power engineering, economics, and social science, that addresses the integration of renewable energy with storage technologies. Additionally, it welcomes position papers aimed at introducing new concepts and paradigms in the field of energy informatics.

Submit your work and join us in advancing knowledge and awareness on how a smart and sustainable energy future can be achieved through integrated energy systems.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
