Advanced Reliability Modelling and Operation Management Strategies for Power Systems

Guest Editors:

Dr. Qingan Qiu

School of Management and Economics, Beijing Institute of Technology, Beijing 100081, China

Prof. Dr. Kaiye Gao

School of Economics and Management, Beijing Forestry University, Beijing 100087, China

Dr. Li Yang

School of Reliability and Systems Engineering, Beihang University, Beijing 100191, China

Deadline for manuscript submissions:

31 December 2024

Message from the Guest Editors

Dear Colleagues,

The reliability and performance of power systems are critical factors in ensuring energy security and sustainability. As power systems become increasingly complex and interconnected, the need for advanced reliability modelling and maintenance optimization becomes paramount. The objective of this Special Issue is to introduce innovative approaches to enhance the reliability and efficiency of power systems, with a particular focus on modelling techniques and maintenance strategies. By delving into the intricacies of power system reliability and exploring cutting-edge modelling and optimization methods, this Special Issue seeks to make substantial contributions to the field. The Special Issue welcomes contributions that explore advanced reliability and maintenance modelling, condition monitoring, optimization strategies, and other topics. We invite original research papers, review articles, case studies, and technical notes that contribute to the field of maintenance and reliability of power systems. Submissions should demonstrate scientific rigour, practical relevance, and novel insights.

Dr. Qingan Qiu

Prof. Dr. Kaiye Gao

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
