Wind Farm Power Curves and Power Distributions

Guest Editor:

Prof. Dr. Andrés Elías Feijóo Lorenzo

Departamento de Enxeñaría
Eléctrica, Universidade de Vigo,
EEI, Campus de Lagoas-
Marcosende, 36310 Vigo, Spain

Deadline for manuscript
submissions:

closed (24 February 2021)

Message from the Guest Editor

Dear Colleagues,

Wind turbine power curves establish the relationship between incident wind speed and generated power and are obtained by the manufacturers. The goal of this Special Issue is to present works about wind farm power curves and wind farm power distributions.

Keywords

- wind turbine
- wind farm
- wind speed distribution
- Weibull distribution
- Rayleigh distribution
- wind turbine power curve
- wake effect
- wind farm power curve
- wind farm power distribution

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
