Dr. Sanzidur Rahman

School of Agriculture, Policy and Development (SAPD), University of Reading, Reading RG6 6UR, UK

Deadline for manuscript submissions:

closed (30 September 2019)

Message from the Guest Editor

Energy from fossil fuel and renewable sources is a vital resource for development. Energy use in agriculture has become a prominent concern because of the rapid depletion of non-renewable sources of energy, rapid population growth, and environmental degradation, especially in developing economies. The concern is particularly high for countries reliant on modern agricultural technologies to promote growth, which in turn is largely dependent on energy use; countries with a high rate of population growth are increasingly using non-renewable and renewable energy to meet the growing demand for food and fibre.

This Special Issue is aimed at soliciting original contributions from academics, researchers, practitioners, NGOs, and other stakeholders providing theoretical insights and/or empirical analysis focusing on the interrelationship between energy and agriculture, which can provide valuable lessons for the future. The editor encourages submissions applying cross-disciplinary approaches and the use of a variety of quantitative, qualitative, and mixed methodologies. The scope of submission includes original research and review articles that address the issues raised above.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
