Biomass Combustion and Utilization for Energy Conversion

Guest Editors:

Prof. Dr. Shuang Wang
School of Energy and Power Engineering, Jiangsu University, Zhenjiang, China

Dr. Anqing Zheng
Guangzhou Institute of Energy Conversion, Chinese Academy of Sciences, Guangzhou 510640, China

Prof. Dr. Xun Hu
School of Material Science and Engineering, University of Jinan, Jinan 250022, China

Deadline for manuscript submissions:
closed (15 December 2021)

Message from the Guest Editors

Dear Colleagues,

This Special Issue in *Energies* (IF: 3.004), entitled "Biomass Combustion and Utilization for Energy Conversion", focuses on recent advances in different biomass utilization technologies, including direct combustion, thermochemical (pyrolysis, gasification, hydrothermal liquefaction) and biochemical (anaerobic digestion) methods. The issue includes papers that either discuss new engineering and science or review the existing literature. Topics examined include new reactors and approaches for biomass utilization, new insights into biomass conversion mechanisms during different utilization technologies, property analysis and further utilization of different kinds of products from biomass, especially those used as high-quality platform chemicals or precursors for novel advanced energy materials, and lifecycle assessments of biomass utilization technologies.

Prof. Dr. Shuang Wang

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: CiteScore - Q1 (Control and Optimization)
