Building Energy Use: Modeling and Analysis

Guest Editors:

Dr. Yuyu Zhou

Prof. Dr. Yi Jiang

Dr. Sha Yu

Prof. Dr. Diana Ürge-Vorsatz

Deadline for manuscript
submissions:

closed (31 October 2018)

Message from the Guest Editors

This Special Issue aims to publish original manuscripts of innovative research in building energy use modeling and analysis. Comprehensive reviews of this research field are also welcome. The potential topics include, but are not limited to:

- Building energy modeling (e.g., EnergyPlus and Integrated Assessment) from single building to global levels
- Comparison of building energy modeling techniques
- Validation of building energy modeling using new data (e.g., smart meter)
- Impacts of global changes (e.g., climate, urban heat island, and extreme heat events) on building energy use
- Impacts of human activities (e.g., behavior and building operation) on building energy use
- Impacts of technology advancement and policy on building energy use
- Building CO₂, black carbon, and HFC emissions modeling and analysis
- Policy analysis and implications (e.g., zero energy building) for building energy use
- Impacts of building energy use on the environment (e.g., air pollution)
- Application of big data in building energy use modeling and analysis

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
