## Sustainable Renovation and Energy Retrofit in Buildings

Guest Editors:

**Prof. Dr. Matthias Haase**

Department of Life Sciences and  
Facility Management, Zurich  
University of Applied Sciences,  
CH-8820 Wädenswil, Switzerland

**Dr. Antonín Lupíšek**

University Centre for Energy  
Efficient Buildings, Czech  
Technical University in Prague,  
Prague, Czech Republic

Deadline for manuscript  
submissions:

**closed (10 June 2022)**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue seeks contributions that address these challenges:

- Role and potential of buildings' energy retrofitting in national climate change mitigation plans;
- National, regional and community strategies for stimulating deep energy retrofitting;
- Overcoming barriers for decision-making on investing in retrofits, especially for homeowners;
- Shining examples of best practices in deep energy retrofitting of public buildings;
- New service offers to reduce the technical, human and organizational barriers of deep energy retrofits;
- New, consumers-oriented approaches (e.g., with one-stop shop (a single point of contact) that guides through the process);
- Role of digitization and industry 4.0 in energy retrofitting;
- Prefabrication-based solutions (economies of scale, construction processes, reduced time spent on site by the workers, organizational challenges);
- Market for prefabricated-based retrofitting solution homes.

## Editor-in-Chief

### **Prof. Dr. Enrico Sciubba**

Department of Mechanical and  
Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
