Deadline for manuscript
submissions:

closed (30 November 2009)

This Special Issue in *Energies*, entitled Coal Gasification and Liquefaction, focuses on recent advances in basic research, technology development, and environmental impacts of new coal energy technologies. The issue includes papers that either discuss new engineering and science or review the existing literature. Topics examined include, among others, coal gasification and liquefaction science and technology, emissions from new coal technologies, lifecycle assessments, environmental impacts of new versus old coal technologies, hydrogen or other fuel production from coal, combining new coal technologies with carbon capture and storage.

Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
