## Recent Contributions and Future Prospects of Converter Control in Hybrid AC/DC Microgrids

Guest Editors:

**Dr. Oleksandr Husev**

Department of Electrical Power Engineering and Mechatronics, Tallinn University of Technology, 19086 Tallinn, Estonia

**Dr. Roya AhmadiAhangar**

Department of Electrical Power Engineering and Mechatronics, Tallinn University of Technology, 19086 Tallinn, Estonia

Deadline for manuscript submissions:

**closed (15 December 2021)**

### Message from the Guest Editors

Microgrids have gained more attention in the past decade since they provide the facility for the exploitation of Distributed Generator to satisfy the growing rate of electricity demand. On the other hand, developments in the power semiconductor technology have opened a new door of power-electronics applications in the power system. In particular, it creates a push to development of the facilities of DC microgrid.

This special issue is devoted to the converter control in hybrid AC/DC microgrids. The state of the art of power electronics topologies as bidirectional interface converters in the AC and DC parts can be addressed. Different control structures of hybrid microgrids, their control strategies, their positive and negative aspects and applications have to be covered. The prospects, main challenges, research gaps, and the trend of the hybrid microgrid structure and control will be in the focus of this special issue.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compindex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
