Design and Control of Electrical Machines and Drives

Guest Editors:

Prof. Dr. Bojan Štumberger

Faculty of Energy Technology,
University of Maribor, Hočevarjev
trg 1, 8270 Krško, Slovenia

**Prof. Dr. Miralem
Hadžiselimović**

Head of the Applied Electrical
Engineering Laboratory, Faculty
of Energy Technology, University
of Maribor, Hočevarjev trg 1, 8270
Krško, Slovenia

Prof. Dr. Sebastijan Seme

Faculty of Energy Technology,
University of Maribor, Hočevarjev
trg 1, 8270 Krško, Slovenia

Deadline for manuscript
submissions:

closed (30 November 2021)

Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses on, but is not limited to, the following topics:

- Electromagnetic and thermal design methods for electric machines;
- Multi-objective optimization of electric machines and drives;
- Core loss analysis and advanced core loss calculation methods;
- Design of line-start permanent magnet and line-start permanent magnet-free machines;
- Nonlinear models of electric machines with concentrated parameters;
- Development of electric machines for electric propulsion;
- Dual-rotor PM machines for electrical variable transmission;
- Development of highly-efficient electric machines for general applications;
- Of-line and on-line methods for identification of electric machine parameters;
- Development of enhanced control methods for electric machines and drives (field oriented control, direct torque control, model predictive control, model-free predictive control)
- Advanced control system strategies for wind power generation systems.

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
