### Message from the Guest Editor

This *Special Issue* invites papers that not only identify new methodologies to make the best use of existing electricity markets mechanisms for achieving the optimal and economical operation of power systems from the viewpoint of transmission or distribution market operators, producers, retailers, aggregators and consumers but also suggest new regulations and frameworks for electricity markets that increase the efficiency of power system operation from technical, social, economic, security, and reliability perspectives. This Special Issue invites papers using a broad range of quantitative, qualitative, and mixed methods.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
