### Message from the Guest Editor

Dear Colleagues,

This special issue invites researchers from academia and industries to submit novel ideas, best practices, and case studies on energy conservation in infrastructures, such as commercial and residential buildings, towers, and houses, and government and public facilities, as well as transportation and roads.

Short and regular papers are expected to discuss challenges in energy conservation measures, analysis, control, and optimization for energy supply, storage, and conversion technologies that covers thermal, gas, and electricity systems.
