Assessment of Energy–Environment–Economy Interrelations

Guest Editor:

Dr. George Halkos

Laboratory of Operations
Research, Department of
Economics, University of
Thessaly, 28hs Octovriou 78, 383
33 Volos, Greece

Deadline for manuscript
submissions:

closed (30 November 2019)

Message from the Guest Editor

Energy consumption and economic growth have been of great interest to researchers and policy-makers. Knowledge of the actual causality relationship between energy and economy with respect to the environment has important implications for modelling environmental and growth policies. The development of new energy and environmental policies, the new climate regime, and the development of new scientific techniques provide enough space for further research. Projects on energy efficiency have been prioritized in the portfolio of policies of many countries, as these policies have been considered as no-regret options, meaning that they may even provide gains for the economy. In order to fill a gap in the literature, this Special Issue is intended to provide an analysis of the energy–environment–economy interrelations, with special attention to the potential role of energy and economic growth on the environment.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
