Message from the Guest Editors

Dear Colleagues,

The Second Energy Future Conference (www.ozenergyfuture.com) will focus on energy storage—from generation to distribution, and cover international advances in the area. As part of the Energy Future Conference, we are inviting publications in the particular areas of energy storage including generation, distribution, policy, and social dimensions. Energy storage is central to the challenges facing society in the 21st century, i.e., how to transition to sustainable energy systems. The challenges are also in the implementation of new technological solutions re-shaping the energy sector, at the grid and off-grid levels, for mobility, but also industrial, commercial, and residential buildings.

Prof. Dr. Kondo-Francois Aguey-Zinsou
Dr Da-Wei Wang
Dr Yun-Hau Ng

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex, Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 13.4 days after submission; acceptance to publication is undertaken in 5.6 days (median values for papers published in this journal in the second half of 2018).
