Deadline for manuscript submissions:  
**closed (1 August 2020)**

### Message from the Guest Editor

Dear Colleagues,

Over the last few decades, the use of computational fluid dynamics (CFD) and experimental fluid dynamics (EFD) methods have penetrated into all fields of engineering. CFD is now becoming a routine analysis tool for design in some fields (e.g., the aerodynamics of vehicles), and its implementation in other fields (e.g., chemical and marine application) is quickly being adopted. Additionally, in the last decade, open source software has had a tremendous impact on the use of CFD. Laser-based methods have also made significant improvements in the methods used to obtain data for the validation of the CFD codes.

The present Special Issue invites contributions on the topic of engineering fluid dynamics, of both experimental and computational studies. Of special interest are submissions from the fields of mechanical, chemical, marine, safety, and energy engineering. We welcome both original research articles and review articles.

Prof. Dr. Bjørn H. Hjertager

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
