Politecnico di Torino, 10129
Torino, Italy

Dr. Antonio D'angola

SI-UniBas School of Engineering,
University of Basilicata, via
dell'Ateneo Lucano, 10, 85100
Potenza, Italy

Deadline for manuscript
submissions:

closed (1 November 2023)

Message from the Guest Editors

Dear Colleagues,

Some of the reasons of the current and future massive development of PV technology are the abundant amount of solar resource, the increase in the efficiency of the PV modules and their price fall. PV is one of the most installed technology in the last years, with a new word capacity of more than 100 GW in 2020. Therefore, it is essential that research world focuses attention on the design, optimal operation and maintenance of PV plants.

The contributions submitted to this Special Issue should deal with the following topics, as well as other potential topics that are not mentioned here:

- Innovative design of PV components and systems (e.g. new maximum power point tracking logics)
- Techniques for automatic fault-detection
- Smart monitoring and maintenance
- Techniques to increase self-sufficiency and self-consumption
- Methods to support the integration of a significant share of PV into the power grids (e.g. storage, active/reactive power management, remote control, grid reconfigurations)
- Planning of PV generation at regional and national levels
- Forecasting of PV generation

Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
