Future Integration of Photovoltaic Systems

Guest Editors:

Prof. Dr. Joseph Mutale

Department of Electrical and Electronic Engineering, The University of Manchester, C9 Ferranti Building, Oxford Road, Manchester M13 9PL, UK

Dr. Brian Azzopardi

MCAST Energy Research Group, Institute of Engineering and Transport, Malta College of Arts, Science and Technology (MCAST), Corradino Hill, Paola, Malta

Deadline for manuscript submissions:

closed (31 January 2022)

Message from the Guest Editors

Dear Colleagues,

I trust you are well and staying safe. As The Guest Editor for the upcoming Special Issue of *Energies* on the subject of "Future Integration of Photovoltaic Systems", I am inviting submissions in the area of emerging PV technologies and systems. The last two decades have witnessed dramatic developments in PV technologies and their uptake. Prices have come down, the products are more robust, and PV technology is now mainstream. Research and development nevertheless continue apace, with new materials such as perovskites being discovered and techniques to improve the efficiency of existing PV technologies also being pursued.

This Special Issue will focus on emerging PV technologies and systems for application in diverse areas ranging from building-integrated systems to grid-scale PV (mini, micro, and utility). Submissions on techno-economic aspects, technical readiness level, as well as the sustainability of the technologies will be particularly welcome.

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
