Message from the Guest Editors

Dear Colleagues,

The 2018 IEEE ICHVE provided an excellent platform for the exchange of knowledge and experiences on high voltage engineering, as well as the opportunity to present the latest achievements in power engineering, including topics such as ultra-high voltage engineering, smart grids, new insulation materials and their dielectric properties.

Topics of interest for publication include, but are not limited to :

- electromagnetic fields
- transients and EMC
- grounding systems
- monitoring and diagnostics
- power and industrial applications
- high voltage insulation systems
- high voltage testing and measurement
- aging, space charge, and maintenance

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
