### Message from the Guest Editor

Dear Colleagues,

The Editor of this Special Issue welcomes papers that address, but are not limited to, the following issues and topics:

- Equipment and system design under uncertainty and variability
- Sources of uncertainty in energy systems design and operation
- Uncertainty modeling and quantification techniques in energy systems
- Uncertainty propagation methods in energy systems
- Robust and optimal design under uncertainty
- Evaluation of energy systems performances under uncertainty
- Case studies comparing actual vs expected performances of equipment and energy systems
- Variability mitigation and hedging in energy systems
- Case histories and wrong design examples

Assoc. Prof. Dr. Paolo Salini

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, AGRIS, Inspec, CAPlus / SciFinder, and many other databases.

**Journal Rank:** [CiteScore](#) - Q1 (*Control and Optimization*)
