## Integrated Energy Systems: Design and Operation Optimization

Guest Editors:

**Prof. Dr. Thomas Kienberger**

Energy Network Technology,  
Montanuniversität Leoben, 8700  
Leoben, Austria

**Prof. Dr. Sonja Wogrin**

Institute of Electricity Economics  
and Energy Innovation, Graz  
University of Technology, 8010  
Graz, Austria

### Message from the Guest Editors

Integrated energy systems interlink multiple energy carriers such as Power, Gas, and Heat over the traditional energy-economic sectors. This integration gives rise to unprecedented high overall energy system efficiency and flexibility. However, these highly integrated energy systems do not exist yet on a large scale and hence need to be designed and operated very carefully. This Special Issue aims to present and disseminate the most recent advances related to this regard.

Topics of interests:

Deadline for manuscript  
submissions:

**closed (30 June 2023)**

- Optimization-based integrated energy-system scenarios;
- (Multi-point) operation optimization in MES considering various (multi) target functions (cost-, energy-, or CO<sub>2</sub>-minimization);
- Unit commitment problems;
- Assessment of energy storage and Demand-Side Management in low-carbon energy systems;
- Techno-economic analyses of technologies and services in integrated energy systems;
- Multi energy systems grid planning and design;
- Design and operation optimization of integrated energy systems in industry;
- Transition in transportation and its impact on integration energy systems
- Development of open-software tools for design and/or operation optimization of integrated energy systems.

Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
