Integration of Energy, Safety and Environmental Systems for a Sustainable Development

Guest Editors:

Dr. Beñat Landeta

Faculty of Engineering, University of the Basque Country (UPV/EHU), Bilbao, Spain

Prof. Dr. German Arana

Faculty of Engineering, University of the Basque Country (UPV/EHU), San Sebastian, Spain

Deadline for manuscript submissions:

closed (30 November 2021)

Message from the Guest Editors

Dear Colleagues,

One of the great challenges for our society, and future generations, is the achievement of sustainable development. Addressing this challenge involves complex interdisciplinary systems, for which the management of energy, safety and environmental systems and their interactions is key. The development of strong regulatory regimes is essential for sustainable development, especially in the current context wherein the COVID-19 pandemic greatly affects our work.

Therefore, this Special Issue focuses on innovative contributions in the management of energy, safety and environment systems and technological solutions for more efficient and sustainable processes. It is necessary to consider the adoption of innovative perspectives and methods in these fields. Contributions broadening the knowledge of environmental, energy and/or safety systems from transversal and integrative perspectives are welcome.

The editors of this Special Issue encourage authors to submit original research articles, in-depth reviews, well-documented case studies or theoretical papers, taking into consideration scientifically based discussions from different perspectives.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
