Experimental and Numerical Simulation of Methane Hydrate Geological Systems

Guest Editors:

Dr. Maria de la Fuente

BGeoSys, Department
Geoscience, Environment &
Society (DGES), Université Libre
de Bruxelles, 1050 Brussels,
Belgium

Dr. Jean Vaunat

Department of Civil and
Environmental Engineering,
Universitat Politècnica de
Catalunya, 08034 Barcelona,
Spain

Dr. Hector Marin Moreno

Norwegian Geotechnical
Institute, PB 3930 Ullevål Stadion,
N-0806 Oslo, Norway

Deadline for manuscript
submissions:

closed (25 March 2022)

Message from the Guest Editors

The characteristics and dynamics of methane hydrate systems (such as the hydrate concentration and distribution, host-sediment petrophysical properties, thermodynamic stability and methane–biosphere/hydrosphere/atmosphere interactions) are key for assessing energy production from hydrates and its role as a future transition fuel; evaluating the effect of the hydrates' dissociation on the ocean floor stability, the Earth's climate and ocean carbon cycles; and developing novel hydrate applications.

This Special Issue aims to gather recent studies on the experimental and numerical simulation of the thermo-hydro-chemo-mechanical behavior of methane hydrate systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
