Deadline for manuscript submissions:

closed (31 March 2022)

# Message from the Guest Editors

Dear Colleagues,

This Special Issue, entitled "Modelling of Wireless Power Transfer II" mainly covers original research related to the modelling of WPT, including academic and theoretical studies, as well as experimental work. It covers a broad range of models, from conceptual and graphical models to mathematical and numerical models. Potential topics include, but are not limited to, the following:

- Near-field WPT;
- Inductive coupling;
- Capacitive coupling;
- Far-field WPT;
- Microwave/RF WPT;
- Optical WPT
- Multi-frequency wireless power transfer
- Simultaneously wireless information and energy transfer (SWIFT)
- Multiple transmitters and/or receivers;
- Optimizing working conditions;
- Energy-encrypted WPT systems
- Frequency control;
- Optimizing power transfer/efficiency/gains;
- Components design;
- Electronics design.

# **Message from the Editor-in-Chief**

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
