Message from the Guest Editors

This Special Issue aims to publish original review and research papers on the subject of electric power distribution systems, including contemporary concepts, modelling, simulations, developments, and real applications.

The main topics of interest includes but not limited to:

- distributed energy resources
- smart grids
- microgrids
- new technologies and materials
- management systems
- optimization and planning
- data science
- artificial intelligence applied to electric power distribution systems

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
