Message from the Guest Editors

The Internet of Things (IoT) is a growing field of research and development. It is connected to other concepts like artificial intelligence and Smart Cities and is also applied to various sectors such as industry (IIoT) and health (eHealth), all of which contribute to the development of a smart society. This Special Issue will collect original research papers and novel insights into new trends in IoT systems relating to energy harvesting, management, artificial intelligence, and social interrelations.

Deadline for manuscript
submissions:

22 February 2022

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, AGRIS, Inspec, CAPlus / SciFinder, and many other databases.

Journal Rank: [CiteScore](#) - Q1 (*Control and Optimization*)
