## Power Electronics and Power Quality 2019

Guest Editor:

**Dr. José Gabriel Oliveira Pinto**

Departamento de Electrónica  
Industrial, Universidade do  
Minho, Campus de Azurém, 4800-  
058 Guimarães, Portugal

Deadline for manuscript  
submissions:

**closed (31 May 2020)**

### Message from the Guest Editor

Dear Colleagues,

Electric power systems are experiencing new challenges: distributed generation, the integration of renewable energy systems, the widespread use of plug-in electric and hybrid-electric vehicles, the electrification of railway systems, the distributed control in smart grids, and the interconnected or islanded operation of microgrids elevates the importance of power quality. This scenario stimulates research and development in monitoring technologies and power electronics solutions to ensure the power quality of future power systems. This Special Issue of *Energies* will collect and disseminate the latest advances in “Power Electronics and Power Quality”, namely in terms of: advanced power quality monitoring; active power conditioners for power quality improvement; power quality in smart grids and microgrids; energy storage systems with power quality ancillary services; electric vehicle battery chargers with smart operation modes; and integration of renewable energy systems with power quality ancillary services.

## Editor-in-Chief

### **Prof. Dr. Enrico Sciubba**

Department of Mechanical and  
Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
