## Public Policies and Development of Renewable Energy

Guest Editors:

**Prof. Dr. Andreea-Ileana  
Zamfir**

Faculty of Management,  
Bucharest University of Economic  
Studies, 010374 Bucharest,  
Romania

**Prof. Dr. Razvan-Andrei  
Corbos**

Faculty of Management,  
Bucharest University of Economic  
Studies, 010374 Bucharest,  
Romania

Deadline for manuscript  
submissions:

**closed (20 March 2023)**

### Message from the Guest Editors

The world is facing unimaginable changes and challenges in all fields of activity. Social/physical distancing and remote working are only some of the new realities that might have different effects on energy needs and consumption. Furthermore, new solutions and public policies for the development of renewable energy are required to protect the environment and to satisfy the energy needs of the economy and society. It is also of interest how these new solutions benefit from the explanation of the firm competitive advantage in the new pandemic context and how the digitalization and industry 4.0 technologies can be used to develop new public policies in this area.

Therefore, this Special Issue encourages researchers, academics, and industry professionals to reveal their conceptual and practical approaches, current observations, and analysis regarding public policies and the development of renewable energy. Qualitative and quantitative research, literature reviews, syntheses, case studies, interdisciplinary research, and all other original research are welcome.

Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
